

OUR 16 YEARS OF JOURNEY

PLATFORM OVERVIEW

FREIGHT FORWARDING SOFTWARE

- ☑ **Quotation & Rate Management** – Contract, Pricing for Sea, Air, and Land.
- ☑ **Job Creation & Booking Flow** – Multi-mode shipment jobs with full operational lifecycle.
- ☑ **Master & House BL Management** – For both Freight Forwarding and NVOCC operations.
- ☑ **Manifest & Documentation Automation** – Arrival notice, Delivery order, Certificate generation.
- ☑ **Billing & Invoicing Automation** – Customer/vendor billing, debit/credit note, deposit reconciliation.
- ☑ **Shipment & Milestone Tracking** – Real-time updates with GPS/Telematics integration.
- ☑ **Customer & Agent Portal** – Self-service for documents, tracking, and communication.
- ☑ **Profitability & Cost Analysis** – Job-wise margin, container cost tracking, and P&L visibility.
- ☑ **Warehouse & Transit Billing (Optional)** – For bonded/transit storage operations.
- ☑ **Mobile App Support** – For field operations, driver updates, POD.
- ☑ **Container Management (NVOCC)** – Container master, slot booking, damage tracking, and deposit handling.

WAREHOUSE MANAGEMENT SYSTEM

- ☑ Inventory Management – Real-time tracking of stock levels, SKUs, and product locations.
- ☑ Inbound Management – Handles goods receiving, GRN, put-away, and quality checks.
- ☑ Outbound Management – Manages order picking, packing, dispatch, and shipping.
- ☑ Barcode & RFID Integration – Enables accurate scanning and tracking of items.
- ☑ Multi-location Support – Controls inventory across multiple warehouses or zones.
- ☑ User Role & Access Control – Assigns permissions based on user roles.
- ☑ Slotting Optimization – Automates best-fit storage allocation based on movement.
- ☑ Returns Management – Streamlines the reverse logistics and restocking process.
- ☑ KPI Dashboards & Reporting – Real-time insights into operations and performance.
- ☑ Mobile & Handheld Support – Enables warehouse tasks via mobile devices.
- ☑ 3PL Billing & Invoicing – Automates billing for storage, handling, and services.
- ☑ Customer Service Portal – Allows clients to view their stock, orders, and reports.
- ☑ Task & Labor Management – Tracks productivity and assigns tasks efficiently.
- ☑ Compliance & Document Management – Ensures legal, safety, and customs compliance.
- ☑ Integration with CRM/Freight /TMS/Accounts/Procurement – Syncs with business systems for end-to-end flow.

TRANSPORT MANAGEMENT SYSTEM

- ☑ Order consolidation , load planning, Route optimization and planning
- ☑ Dynamic trip allocation (owned, leased, outsourced)
- ☑ Auto-assignment of trips to best-suited vehicles/drivers
- ☑ Rate management (contract-based, spot rate, dynamic rate)
- ☑ Digital Inventory App for owned & leased trip (start, load, unload, Delivery, Gate Pass, End)
- ☑ Document upload and verification using AI (DL, RC, insurance)
- ☑ Driver App for Out Sourced Trip
- ☑ Driver scoring (behavior, performance, violations)
- ☑ Fuel tracking and efficiency monitoring
- ☑ Integration with OBD-II, GPS & telemetric devices
- ☑ Trip-based cost calculation & profitability (distance, weight, time)
- ☑ Advance, balance, and payout to drivers
- ☑ Delivery performance dashboard (OTD, delays, route deviation)
- ☑ Real-time alerts and exception notifications

MOVING/REMOVAL SOFTWARE

- ☑ **Quotation & Survey Management** – Local, national, and international move quotes with pre-move surveys (onsite/online).
- ☑ **Job Order & Move Planning** – Task-wise job cards including packing, transport, and unpacking.
- ☑ **Crew Assignment & Scheduling** – Assign drivers, packers, supervisors with calendar integration.
- ☑ **Inventory & Labeling System** – Barcode/QR code-based inventory tagging, labeling, and tracking.
- ☑ **Packing Material Tracking** – Material issuance, consumption, and costing per job.
- ☑ **Customer Portal**– Inventory visibility, job status, digital acceptance.
- ☑ **POD & Claims Management** – Proof of Delivery uploads, damage claims handling workflow.
- ☑ **Billing & Invoicing Automation** – Auto invoice generation for moving, storage, and insurance.
- ☑ **Storage Integration** – Transit and long-term HHG storage billing with inward/outward tracking.
- ☑ **Mobile App for Crew** – Packing checklist, inventory scan, photo capture, job completion updates.
- ☑ **Mobile App for Survey, Estimation & Quote** – Pre Move Survey, Estimation and Spot Quote.

SECURITY AND DATA CONTROL

✓ Two-Factor Authentication (2FA)

 Strengthen user login security with built-in two-step authentication, reducing unauthorized access risks.

✓ IP White listing & VPN Restrictions

 Access can be restricted to specific IP addresses or configured for VPN-only access, ensuring that only approved networks can connect to the system – critical for remote teams and international operations.

✓ Enforced Password Policies

 Support for comprehensive password management includes (Minimum/maximum length, Complexity rules, Password expiry timelines, History enforcement to prevent reuse)
These policies help enforce enterprise-grade security standards.

✓ User Login Activity Monitoring

 All login sessions are tracked with full logs including login/logout times, IP addresses, browser/device info, enabling complete auditability and forensic transparency.

✓ SSL Encryption

 All data transmitted over the web is protected using SSL encryption, ensuring a secure communication layer for end users.

✓ Audit Trail & Action Logs

 Every user action is tracked in the audit trail, offering detailed records that improve compliance, accountability, and internal governance.

✓ Database-Level Encryption

 Critical data such as usernames and passwords are encrypted at the database level, providing an added layer of defense against unauthorized access and data breaches.

CONFIGURATION AND IMPLEMENTATION SUPPORT PROCESS

1 Invoice Issuance & Contract Signing

Establishes formal engagement and activates the on boarding process.

2 Payment Completion

Triggers resource allocation and project initiation.

3 Cloud Instance Setup

A dedicated, secure cloud environment is provisioned, laying the foundation for configuration and data management.

4 Implementation Kickoff

Aligns configuration to your organizational structure, ensuring user access rights, branches, and workflows are accurately set.

5 Comprehensive Application Training

Tailored training based on team size (e.g., ~90 days for 500 users), enabling smooth adoption and user confidence in live scenarios

6 UAT – User Acceptance Testing with Test Data

Validates system behavior with actual workflows and ensures readiness for production

7 Test Data Cleanup

Ensures a clean slate for live transactions by removing all test data

8 Go Live – Full Operational Use

Business officially transitions to QuickMove for daily operations

IMPORTANT FEATURES

✓ Third-Party Integrations via REST APIs

 Integration with various external systems such as Telematics & GPS platforms, lead generation portals, and more.

✓ GST Portal Integration (India)

 Seamless connectivity with the Indian GST Portal for automated e-Invoice and e-Way Bill generation.

✓ ZATCA Integration (Saudi Arabia)

 Compliant e-Invoice integration with ZATCA as per KSA regulations.

✓ Shipping Line & Airline Integration (In Progress)

 Integration for fetching contract rates and dynamic pricing directly from major shipping lines and airlines.

✓ Telematics & GPS Device Integration

 Real-time data sync with partners for monitoring driver behavior, vehicle health, and fuel consumption.

✓ CargoDrive Driver App

 A dedicated mobile app for drivers enabling them to receive trip notifications and bid on trips assigned by TMS users.

✓ MoveSurvey Quote Pro

 A dedicated mobile App for Pre Move Survey, Automatic Estimation and Spot Quote

✓ Digital Inventory App

 A dedicated mobile App for handling the complete Logistics activities during Freight Forwarding, Warehouse, Transportation and Moving /Removal

✓ AI-Powered Automation & Insights (In Progress)

 Incorporation of AI modules to automate internal processes and deliver meaningful business insights.

FEW VALUE ADDED FEATURES

REDUCE COST, IMPROVE TEAM EFFICENCY, PROFITABILITY ,QUALITY AND CUSTOMER SATISFACTION

SIMILAR RATES

The system auto-generates similar past estimates, helping the costing team quickly reference and reuse them, saving time and improving service quality.

AUTOMATIC COSTING

This feature generates accurate estimates quickly, reducing reliance on expertise, saving time, lowering costs, and enhancing service quality.

AUTOMATIC INVOICING

QuickMove's Automatic Invoicing generates error-free invoices from estimates, boosting speed, accuracy, and efficiency while reducing costs.

PROFITABILITY CONTROL INTELLIGENCE

QuickMove's Profitability Control Intelligence lets you define Estimated Gross Profit (EGP) at the quote stage and ensures all jobs stay within profitable boundaries.

CONSOLE SHIPMENT UP SELLING & DOWN SELLING

QuickMove's CRM boosts console and part-load logistics by showing similar enquiries, quotes, and shipment data, enabling smarter upselling, cost efficiency, and higher customer satisfaction.

TRANSIT STORAGE HANDLING

QuickMove simplifies transit storage handling by tracking free periods, aging days, unbilled periods, and billed amounts. It provides detailed reports and dashboards for better insights into transit storage.

SOA AUTOMATION

QuickMove's SOA Automation sends instant account statements, streamlining billing, improving follow-ups, and boosting cash flow with ease.

REPEATED TASK AUTOMATION & WORKFLOW

QuickMove's Task Automation & Workflow Engine streamlines operations, reducing manual work, boosting efficiency, and ensuring consistent, high-quality service.

EMAIL, SMS & TEMPLATE AUTOMATION

QuickMove automates templates for quotes, invoices, and more, ensuring consistent, efficient communication while saving time and reducing errors.

CONTRACT RATES & ESTIMATION

QuickMove's Contract Rates & Estimation feature automates B2B contract management, ensuring accurate estimates, seamless invoicing, and efficiency.

AI-ENABLED INTEGRATED LABELING SOLUTION

QuickMove's AI-Enabled Integrated Labeling streamlines logistics with real-time tracking, paperless automation, and cost-saving label printing.

AUTOMATIC STORAGE BILLING

QuickMove offers a powerful built-in storage billing engine that automates the entire storage billing cycle—tailored for the unique needs of warehouse operations.

ONLINE CUSTOMER PAGES

QuickMove's Online Customer Pages enhance engagement with real-time quotes, orders, and feedback, boosting efficiency and customer trust.

AUTOMATIC PUT AWAY & SMART PICK LIST

QuickMove's WMS automates put-away and smart pick lists, optimizing space, reducing errors, and enhancing warehouse efficiency.
