Moving / Removal Suite

NVOCC Suite

Consolidation

BUSINESS CONTROL & AUTOMATION

Less chasing. More leading.

Bring the job, the team and the financial result into the same picture. Turn connected information into practical control.

Quote with less rework.

Similar Rates, Automatic Costing and Contract Rates & Estimation help teams reuse relevant past estimates and prepare quotations.

See margin before you commit.

Profitability Control Intelligence brings Estimated Gross Profit (EGP) into quotation decisions. Review job costs, revenue and margin as work progresses.

Keep invoicing connected.

Automatic Invoicing links estimates and billing. Statement of Account (SOA) Automation supports account communication and customer follow-up.

Reduce routine administration.

Repeated Task & Workflow Automation and Email, SMS & Template Automation support consistent execution and communication.

SHARED ENTERPRISE & OPERATIONAL CAPABILITIES

CRM & ERP

Customer engagement and enterprise workflows.

Operations / Inland Logistics

Shipping and Storage.

Billing & Accounts · Procurement

Financial and purchasing control.

HR · Payroll

People and payroll management.

Dashboard · Reports

Management visibility and reporting.

Quality · Service Portal

Integrated Labelling Solution and service workflows.

Platform controls Document Management · Roles, Rights & Workflows

Integrated AI Platform

QuickMove includes an integrated AI platform for AI-enabled business workflows. Specific applications are defined by product and release.

FREIGHT SUITE · CONSOLIDATION · NVOCC SUITE

Control the shipment. Understand the margin.

Connect quotations, shipment execution, documentation and job financials—without losing sight of the customer.

Freight Suite

Air, sea, road and multimodal forwarding.

Quote & book

Manage contract and spot rates, quotations, shipment jobs and booking information.

Coordinate & communicate

Bring agent coordination, shipment milestones and customer-service information into the job workflow.

Execute & document

Coordinate import, export and consolidation-related work, master and house documents, manifests, arrival notices and delivery orders.

Bill & review

Connect customer and vendor invoices, credit/debit notes and job costs with profitability review.

Connect what was quoted, what was executed and what the job earned.

Consolidation

A dedicated product. A clear operational focus.

Bring multi-shipper and multi-consignee requirements together with related enquiries, quotations and shipment information.

Use connected commercial information to support consolidation planning, coordination and buying/selling decisions.

Keep consolidation visible—not hidden inside a general shipment list.

NVOCC Suite

Container activity and commercial control.

Manage master and house bills of lading, container records and slot booking, alongside deposits and damage-related information.

Keep documentation and container activity connected with job costs and financial records.

See the commercial obligations behind each container movement.

Quote & plan

Execute & document

Bill & review

Shipment updates and external connectivity depend on the selected workflows and integration scope.

WMS SUITE · TMS SUITE

Know what is stored.

Control what moves.

Keep goods, locations, vehicles, people and customer charges connected from receipt to delivery.

WMS Suite

Inventory visibility that stays connected to billing.

Commercial WMS

SKU-based stock, locations, inbound and outbound activity.

Household Goods (HHG)

Customer- and job-linked goods, packages and storage movements.

Manage the physical work

Connect goods receipt, inspection, putaway, picking, packing and dispatch. Use barcode/QR labelling and mobile capture to support traceability.

Keep chargeable activity visible

Automatic Storage Billing connects recurring charges to the job. Transit Storage Handling tracks free periods, ageing and unbilled periods.

Automatic Putaway & Smart Pick List support configured warehouse execution.

Receive > Store > Pick > Dispatch > Bill

TMS Suite

Control the trip. Understand the cost.

Owned vehicles

Leased vehicles

Outsourced trips

Plan & execute

Plan loads, routes and trips; allocate vehicles and drivers. Capture loading, unloading and Proof of Delivery (POD) information.

Cost & settle

Connect trip expenses, driver advances and settlements with trip profitability and delivery-performance reporting.

Digital Inventory App for owned and leased trips.
CargoDrive for outsourced-driver participation.

Vehicle visibility: compatible GPS and telematics connections support monitoring; device coverage is defined in the integration scope.

Plan > Allocate > Execute > Deliver > Settle

MOVING / REMOVAL SUITE · TRADING SUITE

From the first enquiry to the final account.

Bring commercial activity, operational delivery and the customer account into the same business platform.

Moving / Removal Suite

Give every move a coordinated start and finish.

Local moves

National moves

International moves

01 Survey & quote

Capture pre-move surveys, prepare estimates and quotations, and connect them to the customer job.

02 Plan crews & materials

Coordinate packing, transport and unpacking tasks, crew assignments, and packing-material issue, consumption and cost.

03 Record the work

Use inventory labels, scans, photographs and mobile job updates to connect office teams with operational crews.

04 Complete & bill

Capture delivery evidence and relevant claims activity. Link transit or long-term HHG storage with job billing.

Move Survey Quote Pro + Digital Inventory App

Connect the survey team, the office and the crew.

Trading Suite

Keep buying, selling and financial control connected.

Bring trading activity and commercial documentation together with CRM, Procurement, Billing & Accounts and the operational modules selected for your business.

| Buying

| Selling

| Commercial documentation

| Financial control

Keep the commercial transaction connected to the wider business.

DIGITAL EXECUTION & SERVICE QUALITY

Connect the activity. Deliver confidence.

Give teams and stakeholders the information and workflows to make service more coordinated, visible and accountable.

IDENTIFY & TRACE

Integrated Labelling Solution

Connect goods to digital records through barcode/QR identification and operational labelling. Use scanning within inventory and execution workflows.

Identify · Label · Scan · Update

CONNECT THE FIELD

Mobile execution

Digital Inventory App

Inventory capture and activity updates.

Move Survey Quote Pro

Pre-move surveys, estimates and quotations.

CargoDrive

Outsourced-driver participation.

SHARE THE RIGHT INFORMATION

Service Portal

Give customers, vendors and agents role-appropriate access to service information, documents and interactions. Connect each audience through the workflows enabled for them.

Customers · Vendors · Agents

KEEP SERVICE ACCOUNTABLE

Quality & service management

Feedback, Complaints & Actions

Record feedback, complaints and the associated follow-up actions.

Insurance & Claims

Keep insurance and claims-related activity visible alongside the customer job.

Connect your wider business ecosystem.

REST APIs · India GST e-invoicing & e-way bills · Saudi ZATCA e-invoicing · GPS & telematics

Country applicability, provider access, interfaces and workflow coverage are agreed for each deployment. Additional connectivity is distinguished in the roadmap.

PRODUCT JOURNEY & ROADMAP

Built over time. Designed to keep evolving.

From enterprise foundations to connected logistics and an Integrated AI Platform.

2009–2025 · PRODUCT MILESTONES

2009	Enterprise foundations CRM and ERP.
2013	Quality & digital surveys Quality management and the Pre-Move Survey App.

2026

PLATFORM & CONNECTIVITY

Integrated platform expansion

Integrated AI Platform
NVOCC Suite

Integration & enhancement focus

- FTA integration / UAE e-invoicing
- External track-and-trace integration
- Shipping-line and airline documentation connectivity
- WMS end-customer app
- TMS enhancements

Availability of these integrations and enhancements is confirmed by release.

2027

PLANNED ROADMAP

- NVOCC enhancements
- Customs connectivity through ICEGATE
- Expanded paperless TMS execution through the Digital Inventory App
- AI-powered CRM

Product milestones follow QuickMove's supplied history. Planned items are not delivery commitments; scope and timing depend on validation, third-party services and release readiness.

CUSTOMERS, DELIVERY & CONFIDENCE

Built around real logistics businesses.

Selected customer references from the QuickMove community.

300+ clients **42+** countries

Company-reported reach

Controlled access. Clear accountability.

Role-based permissions, two-factor authentication, password policies, IP restrictions, login history and audit logs support operational oversight.

A structured path to adoption.

Discover → Configure → Prepare Data → Train → Validate → Go Live → Support.

Agree scope, responsibilities and delivery milestones before rollout.

See QuickMove in your operation.

Book a demonstration around your workflows and the outcomes that matter to you.
